

INTRODUCING

MindBridge

Your AI Memory Layer

THE PROBLEM

Every AI conversation starts from zero.

You repeat yourself. Your context dies.

Repeat context daily

Switch AIs, lose memory

Hours lost re-explaining

SOLUTION · FEATURES

The Solution

MindBridge captures your AI conversations, extracts structured memory, and injects relevant context into any new AI session — automatically.

Context always travels with you

Semantic memory across all AI tools

Instant retrieval, zero re-explaining

Browser Extension

Reads prompts & responses from ChatGPT, Claude, Gemini

LLM Memory Engine

Extracts summary, project, tasks, tech stack via AI

Vector Storage

Stores embeddings in Chroma/Qdrant for semantic search

Context Injection

Surfaces relevant memory in new AI sessions instantly

HOW IT WORKS

1

Capture

Extension reads chat
from any AI

2

Extract

LLM structures:
summary, tasks, stack

3

Store

Embeddings saved to
vector DB

4

Retrieve

Semantic search finds
relevant memory

5

Inject

Context auto-appended
to new sessions

End-to-end pipeline runs in < 2 seconds after each conversation

HOW IT SOLVES THE PROBLEM

BEFORE MindBridge

- ✗ Start every chat from scratch
- ✗ Manually paste old context
- ✗ Switch AI tools, lose everything
- ✗ No memory between sessions
- ✗ Wasted time re-explaining projects

VS

AFTER MindBridge

- ✓ Memory captured automatically
- ✓ Context injected into new AI sessions
- ✓ Switch AIs seamlessly with full context
- ✓ Persistent semantic memory layer
- ✓ Focus on work, not re-explaining

BUSINESS MODEL

NOW

Solo User

One person. One AI memory layer.
Works across ChatGPT, Claude & Gemini.

Personal memory engine

Browser extension capture

Private vector store

Context injection

Individual · Browser Extension · Self-serve

Company Plan

Multiple users. Shared memory pools.
Org-wide AI context for entire teams.

Multi-user memory workspace

Shared org-level knowledge base

Role-based access & privacy

Admin dashboard & usage insights

Teams · Enterprise · API + SSO · Notion/Jira Sync
